

Using the Agricultural Conservation Planning Framework (ACPF) in Farm/Field-Scale Conservation Planning

PRE-PLANNING

- Access available watershed assessments and watershed-wide ACPF output maps through Conservation Desktop (CD) or other stand-alone products; review results to prioritize outreach in critical source areas.
- Compare resource concerns identified through ACPF to existing inventories in Conservation Assessment Ranking Tool (CART) and CD.
- Use ACPF output maps to help score and rank program applications.
- Use ACPF maps to identify and target critical areas for assessment at the field scale.
